“Close the schools and keep feeding the students, ‘How are we going to do this?’”

The coronavirus pandemic has all Nutrition Services departments changing the way they serve meals. Packaged and wrapped meals prepared for take home had to be done and they got it done. First, Nutrition Services started with cold sandwiches, purchased grocery style bags, and started serving curbside. Then they added (hot) meals with instructions to heat up at home. Some Nutrition Services ordered packaging machines, trays and film, others continued to use bags and containers – providing meals to the students was and is their number one priority.

Now most districts are faced with having to serve different styles on the same campus; some students on campus, some students learning remotely and some hybrid students, and all meals are free.

G.A. Systems has the solution: **Speedee-Serv® Speedlines.**

## THE SOLUTION

The **Speedee-Serv® Speedline** system was developed and introduced over 50 years ago. Speedlines are mobile serving counters that hold pre-packaged foods at safe hot and cold temperatures. G.A. Systems speedline cabinets are built to last, we have the proof and the references. We provide locking bars with each speedline cabinet, this means that the district employee does not have to move the speedlines daily. Transport food using our stainless-steel wire baskets and dollies to the speedlines, load up and serve students from a classroom, hallway, or other remote location on campus. The refrigerated speedline cabinets use a refrigerated snap in (RSI 1/3) unit that recirculates cool air and is self-contained with a built-in condenser fan motor that requires no drain. The RSI 1/3 unit is easily removable to reduce down time, should a problem occur. And can be changed by a district maintenance mechanic, eliminating the expense of an outside service company.

The **Speedee-Serv® Speedline** can be used just about anywhere on campus. Providing flexibility during these challenging times and after.

## DISTRICTS USING SPEEDEE-SERV® SPEEDLINES

Alvord Unified School District, CA  
Anaheim Union High School District, CA  
Clark County School District, NV  
Colton Unified School District, CA  
Desert Sands Unified School District, CA  
El Monte Union High School District, CA  
Gilbert Public School District, AZ  
Irvine Unified School District, CA  
Kent School District, WA  
La Villa Independent School District, TX

## SPEEDEE-SERV® SPEEDLINES AFTER COVID

After COVID continue to use your Speedlines to serve school meals at various locations throughout your school campus to provide additional convenient locations for students and staff.

You may have special programs that would benefit from the flexibility and convenience of Speedlines like extended day programs that provide breakfasts or afternoon snacks which can be used to distribute meals. Convert your Speedlines to Serve Up Counters using our accessories; pan adapters, tray slides and sneeze guards for Catering events.

**Speedee-Serv® Speedlines** provide you the ability to set up and leave them set up and know that the food is safe and ready to be served.

# **SPEEDEE SERV® SPEEDLINES – DESIGNED, BUILT AND PROVEN TO SERVE STUDENTS FAST AND SAFE**

50 years of experience, 16 models of refrigerated cabinets, 16 models of heated cabinets and multiple combination of heated/refrigerated cabinets.

Instead of steam tables, flat top heated counters, frost tops and refrigerated wells, G.A. Systems Speedlines cabinets heated and refrigerated use recirculating air to maintain food temperatures with the lids off during serving times. The stainless steel well accommodates stacking wire baskets that hold pre-packaged meals, sides, and beverages. One Speedline system can serve 450 students in 15 minutes without replenishing. Speedlines are fast, safe and presently being used in many districts. We can provide you a list of references.

## **SPEEDLINE IN ACTION**

Before COVID video (link available upon request)

Speedlines are available in 30" and 36" widths, 4 lengths and 2 heights; that makes a "Sweet 16"! Yes, we offer 16 options of refrigerated speedline cabinets and 16 options of heated speedline cabinets and to complete the system, we have 8 pack wire baskets for the 30" wide cabinets and 10 pack wire baskets for the 36" wide cabinets, both in different depths, dollies, and lid carts. Accessories: tray slides; stainless or solid surface material, merchandising racks, over-shelves; glass or stainless steel with heat or frost, overhead structures with signage/menus, cash shelves, tray shelves, pan adapters, sneeze guards; glass or acrylic to convert speedlines into serve up counters after COVID-19.

Looking for a more upscale look? Our Speedlines counter tops can be ordered with solid surface material in lieu of stainless steel. Each cabinet comes equipped with a locking bar, to secure lids and contents. **INCREASE PARTICIPATION, CONTROL LABOR COST, IMPROVE PRE-PACKAGED FOOD QUALITY, SATISFY STUDENTS, TEACHERS & ADMINISTRATORS WITH *Speedee-Serv® SPEEDLINES*, by G.A. Systems!**
